Celebrate Canada's Diamond Jubilee In Raymond

"Celebrate Dominion Day in Raymond," should be the slogan of all Raymond citizens. Help your home town commemorate Canada's 60th natal day. Plans are being perfected for the greatest first of July celebration ever held here. Lend your presence; be generous with your enthusiasm. Tentative plans, which will be outlined in detail at a meeting of committees tomorrow night, call for a fine morning program embracing a gorgeous pageant. There will also be a grand parade featuring floats from all local business houses, decorated cars, decorated horses, decorated buggies and wagons, a children's parade, comic events, with big prizes for each section. Further details will be announced soon. Then, too, there will be thrilling bronco busting events, fast horse races and auto races at the fair grounds. Horses owned by Meeks brothers, Heggie brothers and Ray Knight will be seen in action together with Spud Murphy's string from Montana. These with a complete card of athletic events, a tug-of-war, horseback wrestling, and a baseball game will go to mark Raymond's big day. In the evening there will be a great spectacle of fireworks, and a big dance in the Opera House. Broadway will present a lavish display of flags and patriotic decorations. Citizens are also requested to decorate their homes and gate posts as much as possible.

Town Council Notes

Constable Van Orman reported two deaths, five births and two marriages for last month. There were no quarantine cases at the time of the report.

The salary of Dr. Astor, as health officer, was increased from \$250 per year to \$300.

A request for a donation to the school fair was requested by fair officials. The customary \$25 was granted.

A communication from J. C. Tittsworth requested a reduction in taxes on the dogs he handles for training purposes. A reduction from \$12 to \$8 was made.

A bylaw for the handling of nuisances was read. The bylaw did not define what constituted a "nuisance". The secretary was instructed to request solicitor Ostland to suggest examples in the bylaw.

A number of residences and business houses requested permission to connect basement drains with the drain along Broadway. Permission was granted.

A special meeting will be held this evening to read the new assessment roll.

An offer from R. W. Tollestrup to operate and maintain the pumping equipment at both stations, to bear the expense of all repairs, supply necessary oil and grease, and to attend to replacement of broken street lights, at a salary of \$1000 per year, was tabled until next meeting.

Watermaster Hawk came under severe criticism because of laxity in not keeping doors of the pumping stations locked. It was pointed out that children persist in playing around the stations, and that accidents could easily happen through falling into the well or by touching live electric apparatus used in pumping. Mr. Hawk was instructed to keep the doors locked. In a further discussion the Council ordered the watermaster to attend more carefully to the filling in of excavations made for the purposes of repairs in the water lines.

Born—To Mr. and Mrs. T. Geo. Wood last Sunday, a son.

Alda, the 4-year old son of A. Bullock passed away last Sunday at the Galt Hospital shortly after his arrival there. Funeral services were held on Tuesday in Welling. Interment was made in the Raymond cemetery. M. E. Christensen was in charge of the funeral.

Editorial Notes

An optimist is a man who expects the rural roads to soon be in good repair.

On the face of it Mr. Tollestrup's proposal to the town council to operate and maintain the pumping stations at a salary of \$1000 per year, and make repairs at his own expense, sounds like a money-saving proposition to the town. The present water master costs the town \$1500 per year with repairs piled on top of it. Repairs and wasted "juice" alone cost the town during the last year or so a sum equal to what Mr. Tollestrup asks for his services, repairs, oils, and for changing street lights. The action of the council in this matter will be watched with great interest.

Lou King claims that the new Ford, now being manufactured, will have so much speed that it will have to be driven with the brakes on to keep from flying. It will also go 40 miles on a gallon of gas—if you can find that kind of gas.

Stan Ellis and his crew have been working so fast to finish the new Allred building that they have to stop every two hours to bail the perspiration out of the cellar.

News Notes

Reed Kirkham returned last week from Salt Lake City where he has been attending university.

Geo. D. O'Brien was successful in his examinations taken at Lethbridge recently, and has received a 3rd class engineer's certificate.

W. Lally of Edmonton, is relieving at the Standard Bank while Douglas Paris takes his holidays.

A vigorous campaign against noxious weeds is again being undertaken this season by the Department of Agriculture. Following a number of conferences at different points in the province attended by officials of the department, municipal councils and farmers, the sixteen field supervisors will take up their duties and co-operate with farmers and municipal officials in the eradication and control of the weeds which every year reduce the amount and quality of grain yields.

Remarkable Development Of Canada's Greatest Industry, The Growing Of Wheat

Canada's greatest individual industry, wheat growing, has developed almost entirely since Confederation. The present generation of Canadians are accustomed to speak of their country as the granary of the world, a phrase which would have been meaningless sixty years ago when Confederation was brought about.

Canadians must look with pride upon the achievement in wheat production of the last sixty years. What it means to the general business and to the transportation of the Dominion needs only be stated to be understood. Exports of wheat from Canada in the last two years, and these were only average crops, have brought in to this Dominion more than \$175,000,000 annually. This money, coming into the possession of the farmers, has been spent on the hundred and one articles which they need, thus stimulating the industrial centres remote from the grain fields and affecting, indirectly, every citizen of the Dominion.

The bulk of Canada's wheat crop is grown in the prairie provinces. Each harvest time the enormous task of transferring this crop from the fields to the consumers in distant countries is undertaken and accomplished. The farmer hauls his wheat to the country elevators, the original gatherers of the crop. There are about 2,500 country elevators in the wheat producing area. The wheat is then loaded into box-cars and is started eastward and westward, as the case may be, to seaboard. If it is westward there is the long rail haul over the Rockies to Vancouver or Prince Rupert, whence it is shipped to Europe through the Panama canal, or to the Far East. In 1921-22, the last crop year for which final figures are available, 23,900,000 bushels went through Pacific ports. In subsequent years the movement has been greater.

The greater part of the crop comes eastward in box-cars to Port William and Port Arthur, where large terminal grain elevators are located. In 1921-22, the figures are interesting because relatively they change very little from year to year. 150,000,000 bushels came east. All this wheat, whether eastbound or westbound, is inspected by Dominion government inspectors and is graded according to quality.

The grading of wheat in this quantity of itself is a monumental task, achieved first by this Dominion and followed by a few other wheat exporting countries. Without government grading the marketing of Canada's export crop at a fair price would be impossible.

The world's market for wheat is Liverpool, England. Here come buyers and sellers and the custom, as in ancient times, is for the seller to show a sample of his wheat so that the buyer may see what he is purchasing. Obviously, when production reaches such proportions as it has in Canada this no longer can be done. The Canadian government solved the difficulty by establishing a grading system. Canadian wheat is graded under well-defined regulations and any buyer in the world may buy the quality of wheat he desires by grade. The quality is guaranteed and in many years of experience foreign buyers have not yet complained.

Having reached Port William and Port Arthur, the mass movement of the crop is at end. From these ports it breaks into a score of channels all of them moving eastward towards the ocean. The grain fleets come to the head of the lakes for their cargoes. The wheat is loaded into these steamers and some of them sail to the Georgian Bay ports, others to Port McNicoll, still others to Port Colborne, many to Buffalo, and a few go right through to Montreal.

A Perpetual Bank Account

Kipling when a citizen of Brattleboro, Vermont, where he established his hangout, "Naukukla" in which he wrote some of his famous works, habitually paid by check. Puzzled to find that he always had too big a balance at the bank, he investigated, and discovered that merchants preferred, instead of cashing his checks, to frame them as souvenirs. *Forbes Magazine.*

First Universal Language

Volapuk was the name given to what was intended by its author, Johann Schleyer, a teacher in Switzerland, to be a universal language. For some time after its invention in 1879, it flourished exceedingly, but then it languished, and its place is now taken by Esperanto, proposed by Dr. Zamenhof, of Warsaw, Poland, in 1887.

Danish Government May Aid Immigration

Country Is Fertile Field for Recruiting New Canadians

Conducting a party of 85 Danish settlers, who reached Montreal on the White Star liner, Doric, to points in eastern Canada, Lorenz W. Suss, travelling inspector for steamship companies in Denmark, declared that Denmark was a fertile field for recruiting Canadian immigrants.

Considerable unemployment prevails there. The chief drawback to a larger influx is lack of money. In this connection, however, said Mr. Suss, the Danish government is considering ways and means of meeting this difficulty and is studying a plan practised by the Norwegian government whereby prospective emigrants are furnished with sufficient funds and given easy terms in the matter of repayment.

To Buy Canadian Cattle

Association Formed in South Wales For Direct Importation

The Canadian trade commissioner at Bristol, England, reports the formation of the South Wales and Monmouthshire Cattle Importers' Association, Limited, which during April filed a copy of their prospectus. The chief purpose of this co-operative movement is the direct importation of Canadian store and fat cattle, and to this end a central Canadian purchasing organization has been established. The new association represents nineteen meat traders' associations throughout South Wales and Monmouthshire and the capital is approximately \$30,000.

Braid Trimming Is Smart

This attractive dress has the much desired slender lines and is a style suitable for all daytime wear. The front and back are quite plain and the plaited side-sections give added width and grace to the skirt. Braid is effectively used on the bodice to form a deep pointed yoke, and also trims the convertible collar, the cuffs, finishing the long dart-lined sleeves, and sides. No. 1522 is in sizes 36, 38, 40, 42 and 44 inches bust. Size 38 requires 4 1/2 yards 39-inch material, or 3 1/2 yards 41-inch, and 7 yards trimming braid. Price 20 cents the pattern.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

British Colonial Empire

Colonies and Protectorates Have Population of Fifty Million

"That the extent of the British Colonial Empire—that portion composed of colonies and protectorates, etc.—is roughly two million square miles with a population of 50,000,000, was the interesting statement in the report of the committee appointed by the present colonial conference to frame a scheme based on contributions to a common pool, for the creation of a scientific and research service. This service should be available to the whole Colonial Empire.

The committee, in view of the short time available, decided to restrict the inquiry to medicine, agriculture, veterinary science and forestry.

The conference of governors recently approved the scheme set out in the report and requested the colonial office to appoint a committee to work out a detailed scheme for submission to all the Governments concerned. The conference was of the opinion that the scheme could be commenced on an income of about \$875,000 yearly, of which a considerable portion would be used in replacing existing expenditures on salaries of agricultural research officers.

Jersey Herds for Western Canada

B.C. Registered Stock Imported by Manitoba and Alberta Breeders

Recent Jersey shipments by B.C. breeders to the prairies have included six herds from the well-known S. Matson herd, Victoria, in N. Norway, McAnley, Man., who will use them as foundation stock for a new Jersey herd he is establishing. In this lot are some exceptionally well-bred young things by a son of Zenda Sultan. One heifer is a daughter of the cow, Jimmie's Marigold Fern, whose record exceeds 1,000 lbs. butter, and the others are out of high-record cows. Another new prairie Jersey herd is that being established at Viking, Alta., by Child Bros.

Wild Horses Are Worthless

Hundred Dollars Highest Bid Recently in B.C. for Eighteen Head

Hunters in the interior of British Columbia are expected to turn in 1,000 sets of ears from wild horses they will have killed on the range this year. For these they will get a bounty of \$150 per set from the provincial department of lands and forests. The horses are practically worthless, \$100 being the highest bid received for a corralled 18 head rounded up recently at Springhouse, one of which was a four-year-old stallion weighing only 300 pounds.

Consumption of Eggs in Canada

Canadians are now the greatest individual consumers of eggs in the world, according to the Minister of Agriculture, speaking here. The per capita consumption of eggs in Canada has risen from 15 dozen to 28 dozen since grading was introduced. Canada consumes 99 per cent. of its own egg production.

To Improve Highways

Two million dollars will be spent in the Central Manitoba mineral area on development work this year. Improved navigation and highways into this district are included in the activities of the Mining Bureau of the Winnipeg Board of Trade.

Marriage to a woman means a lifetime job as a detective.

Canada Prefers British Settlers

But Only Limited Number of Right Class Are Available

"The importance of applying policies providing Canada with manpower, without introducing unemployment but rather increasing the demand for labor, must be emphasized, with the necessity of preventing the admission of undesirable emigrants," Hon. Robert Forke, Canadian Minister of Immigration, declared in London while discussing Canada's immigration problems with newspapermen. "Canada's immigration activities are therefore both positive and negative," he added.

Shortly after his arrival with W. J. Egan, Deputy Minister of Mr. Forke's department, the Minister received about 20 journalists at his hotel and, after reading a written statement he had prepared, answered their questions.

"Canada has adopted the policy," he said, "of encouraging farm laborers and household workers. In recognition of the strong British strain in the national fabric, special emphasis is laid upon immigration from the British Isles. Courageous steps have been taken to relieve the British settlers of the handicap of high ocean rates. The fact that only a limited number from the classes mentioned are available from the British Isles necessarily broadens the field to include the United States and European countries from which suitable settlers may be secured."

Nebraska Farmers Coming

Advance Agents Seeking Suitable Tracts of Land in Alberta

Representing fifty Nebraska families who wish to settle on Canadian farms, Frank Stewart, of North Platte, Neb., headed a delegation of three who have been conferred with C. A. Van Sney, superintendent of colonization for the Canadian Pacific Railway. The land seekers will go to Calgary with a representative of the colonization department to inspect suitable tracts in Alberta. The group proposing to emigrate has ample capital, it is said.

Special Crate for Shipping Fish Eggs

A special crate for shipping fish eggs has been developed by the Canadian Department of Marine and Fisheries. In this type of case salmon eggs have been shipped from the Maritime Provinces to British Columbia; from St. John, New Brunswick, to Dublin, Ireland; and from Vancouver, British Columbia, to Tokyo, Japan. The eggs in these shipments hatched out practically as well as those hatched at points at which they were produced.

Out of Everything

If you haven't an automobile you are out of everything, including debt. If a friend presents you with a watermelon, you can't get it home conveniently. If you wish to go anywhere not on a railroad or street car line, you must call a taxi, or depend upon a friend who owns a car, and you and your car-owning friends are seldom interested in going to the same place. If you walk you may be run over.

Training Indian Children

The training of Indian children in Canada is one of the important activities of the Department of Indian Affairs. There are nearly 15,000 Indian boys and girls enrolled in the 341 Indian schools under the direction of the Department.

There are various mediums of art, this photograph being an example of the clever use of sugar by the veteran pastry chef of Chateau Lake Louise, John Meyer. It is a true copy of the new Hotel Saskatchewan, Regina, 28 by 35 inches, weighing 80 pounds, of glistening white sugar. Mr. Meyer did all the work on the candy structure himself, the masterpiece occupying his time for ten days. The candy copy of the new hotel was taken to Regina for the opening on May 24th.

Canada Is Reaching Out With An Ambitious Program Concerning Aerial Navigation

Proves Water Has Skin

Easy Experiment Anyone Can Test for Themselves

There is a skin we touch every day of the year, a skin we see often or than we touch, a skin which few of us realize is in existence. If we break it or hurt it it heals itself without our help and possesses the power of self-renewal quite as much as anything in nature.

It is the skin of water. But where is there any skin on water? Right on the outside—right where you would expect to find a skin on anything. Every surface of water behaves almost precisely as if it were an elastic membrane under tension. Drop a few drops of water from a spoon, bottle, or the end of your finger, and see them trickle down, first pear-shaped and then rounded into little globes, behaving exactly as if they were confined by rubberskins.

But why globes? Because a globe is just the shape an elastic skin must take if acted on by pressure within, or if trying to close in on a fluid within it. Even the sausage-shaped balloons of the street vendors tend to take the spherical shape when inflated. A sphere happens to be the one shape of all possible shapes which can contain the greatest amount of space within the least amount of surface.

And here's a particularly easy experiment which can be made right now, at home or at the office, which shows what this skin is like and how it behaves. All you will need is a short bit of cotton string and a bowl or glass nearly filled with clean water. Be sure that the bowl or glass is not greasy, for we don't want any grease just yet. Now lay the cotton string just across the surface from side to side so that it divides the surface. The way it is now the skin of water pulls the string both ways, so it does not move. It remains still.

Now, to show the pull, or as the physicists call it, the tension of this water skin. Drop a few drops of oil on the water to one side of the string. Immediately the string will move away from the oily side, pulled by the elastic skin, for the oil immediately forms an oil skin on one side of the string and the oil skin has less tension than the water skin on the other side—hence the string moves with the more elastic skin.

International Stock Show

A Carload of Bacon Hogs From Manitoba Will Be Exhibited

A carload of bacon hogs will be included in Manitoba's exhibit at the International stock show in Chicago this coming fall. J. E. Ritchie, manager of the Provincial Fair, has returned from a meeting of the Manitoba Livestock Board, where preliminary plans were laid. The bacon hog exhibit on such a scale will be the first step by Manitoba to gain recognition for that particular type of animal raised in the province. Three carloads of hogs and two of cattle will be sent by the province to Toronto and elsewhere, a portion going on to Chicago. The sheep men will have a worthy exhibit for Toronto, Winnipeg, Ottawa and other centres.

Alberta Sugar Beets

Farmers throughout Southern Alberta are supporting the sugar factory admirably. To date 7,000 acres of beets have been contracted for with an anticipated increase of 500 acres, which will bring the total to 7,500 acres of sugar beets for the 1927 season. A notable feature this year is the thorough preparation of the soil before planting.

Using Reindeer in French Alps

One dozen reindeer are to be moved from Norway to the French Alps with a view to acclimatizing them and utilizing them for hauling sleighs on the mountain roads in the winter months. The reindeer, it is claimed, will render accessible many picturesque spots in the mountains which cannot be reached by horse-drawn or motor-driven vehicles.

Dad—You're behind with your studies, son.

Son—Well, how could I pursue them if I weren't?

Animals that occasionally are fed candy, are much more easily handled than those which never have tasted sweets. Says a big game hunter and zoologist.

It is usually tomorrow that all great things are expected to happen.

In this year of Jubilee Canada is reaching out with an ambitious program of aerial navigation which the most imaginative of the Fathers of Confederation never entertained even in their wildest dreams.

Flying in Canada was born of war, and in these later days of peace the conquest of the air goes on apace. During the war flying was a young man's game, and the youth of Canada won renown with machine-guns hissing from the cockpits, propellers roaring, and bombs swaying from the undercarriages. It was grim business but it proved the sporting blood of a young nation.

Peace, came and these young men who rode the whirlwind returned to Canada to earn their living as civil servants. But the spirit of war airwork survived, and in a small but seasoned organization called the Royal Canadian Air Force the traditions of aerial navigation were carried on. The young aviators, trained in war days looking to the civil departments of government for employment. They were needed and within two or three years of the close of the war many of them were in the Royal Canadian Air Force, detecting forest fires, locating smugglers on the frontiers, and mapping out by photography the vast areas of the hinterlands.

Civil flying soon pushed its way to the front during the post war years, and the government of Canada was quick to establish the necessary code of laws for aerial navigation. The administration of these regulations was given to a branch of the Royal Canadian Air Force, and today the Dominion is safeguarded by a set of strict regulations governing the licensing of all mechanics, pilots, air harbours, international flying signals, and the inspection of air craft.

The most conspicuous work done during these recent crowded years of flying history in Canada has been the survey work in which the Dominion has led the world. Other countries have put on spectacular flights of astonishing endurance, but Canada's contribution has been along sound commercial lines. In 1926, 56,000 square miles of Canadian territory were photographed and mapped with an accuracy which would have required years and millions of dollars, if done by ground work.

The year 1927 has brought a partial acknowledgment by parliament of this valuable work. Since the war Canada has never spent more than \$1,500,000 a year for air development.

This year more than \$2,000,000 was voted by parliament for the Royal Canadian Air Force to be divided between military and civil flying. Civils are being encouraged to set aside land for future air harbours, technical advisers from Great Britain are visiting the Dominion to make recommendations for the future linking of the Empire by airways, and the Post Office Department is taking the initial steps towards what will be an Atlantic to Pacific air mail route.

Canada's future in the air is assured. So certain is the Canadian Government of the development to come that at the Imperial Conference of 1926, Canada pledged herself to the erection of a great moving mast which will be one of the air ports for the vast dirigibles being built in England to cruise the world through the Empire's skyways.

Strawberry Crop

Yield Expected to be Larger Than Last Year

Reports from strawberry producing districts of Canada to the Department of Agriculture show that the commercial plantations in all the provinces have wintered well and, providing weather conditions remain favorable, the yield, based on normal production, should be slightly larger than last year. The Dominion's acreage last year was 4,600, producing a crop of 11,112,500. This year the estimated figure is 13,501,800 quarts or an increase of 20.5 per cent.

Beacon for Aviators

For the benefit of aviators on the Mediterranean air route a million candle-power beacon is to be installed at the summit of Mount Etna in Sicily. The power is to be generated by the winds which are continually blowing at the top of the mountain.

In Great Britain the feet are used as an aid to identification and it has been shown that the inhabitants of London have long slim feet, those of Wales low in the arch, and those of Scotland, broad in the sole.

You can't believe everything a woman says who compliments another upon her beauty.

WORLD HAPPENINGS
BRIEFLY TOLD

For the first time seven judges took their seats on the bench of the Supreme Court of Canada. The Supreme Court was enlarged last session to its present complement.

Congratulations upon the recent opening of the Commonwealth parliament at Canberra have been transmitted by President Coolidge in a message to the governor-general of Australia.

Liquor seized by the coastguard from rum runners outside the 12-mile limit can be introduced as evidence in the trials of the rum runners, the U.S. Supreme Court decided.

Motorists and conductors of the Winnipeg Electric Railway have settled the question of wages by accepting the company's offer of one cent an hour increase each year with a three-year contract.

By the present tentative plans the Prince of Wales and Premier Baldwin will sail from England July 23, arriving in Quebec July 29. The Prince and the Premier will spend August 2, 3 and 4 in Ottawa as guests of Their Excellencies, the Governor General and Lady Willingdon and of the Government of Canada.

One of the finest collections of Indian material in Canada consisting of bone, horn, stone and slate objects which was recently purchased by McGill University has just arrived at the David Ross McCord National Museum. This collection was dug from the ground many years ago in the district surrounding Brantford, Ont.

"First class" is the word that Hon. George Hoadley, minister of agriculture, applies to Alberta crop prospects. He says that in 36 years' experience in the province he has never known the land in general to be in such good condition, and the reports that are coming in give every reason to expect a big season.

Sh. Frederick Stupart, director of the Dominion meteorological bureau in commenting on the predictions of Herbert Browne, of Washington, D.C., to the effect that 1927 will be a summerless year, said he does not regard such a prospect as probable, and that even if the year should prove to be summerless it would be impossible to foretell the fact this far in advance.

Observing Diamond Jubilee

Large Attendance Expected at Service in Westminster Abbey

Preparations are now well advanced for the great service in Westminster Abbey, July 1, which will form the chief commemoration in London of Canada's Diamond Jubilee. The Dean of Westminster, Very Rev. Dr. Foxley Norris, has drawn up an order of service which follows as nearly as possible that which was used when the jubilee of Confederation was commemorated in the Abbey in 1917.

Owing to the King and Queen having a number of engagements to fill in Scotland so close to the date, it is feared it will be impossible for Their Majesties to attend the service. The Duke of Connaught already has intimated his intention to be present. Practically the whole of the British cabinet and a large number of representatives of embassies and legations have asked that seats be reserved for them.

Not to Be Trusted

Great Britain has tried in many ways to honor the fiction that Moscow's diplomatic intentions are honest and that its word can be depended upon. She has always found to her cost that confidence of this overgenerous nature was sadly misplaced. The Soviets are incurable. They do not let the right hand know what the left hand is doing. They make promises to one's face and break them behind his back.

No man can tell what his wife is going to do by what he tells her to do.

The man who pays as he goes seldom gets beyond his speed limit.

W. N. U. 1684

Molding the Child's Life

A Warning to Mothers to Watch Childhood Dreams

An exhortation to mothers to study and mold the all important dream life of their children, which when uncontrolled may lead to disaster, is contained in an article by Florence Hull Winterburn in the June issue of "Psychology Magazine."

Mrs. Winterburn in emphasizing the importance of the child's dream life writes: "It is from childish dreams that the stuff of good or evil lives is obtained. The little child knows so much less than he believes; he believes so much more than he imagines. Imagination is the king of his life, the priest of his faith. What he wants—this he dreams about. What he has in dreams, this he aspires toward in his daily life. Dreams influence reality and reality gives out the material from which dreams are built."

"If it is hard," points out Mrs. Winterburn, "for even the most logical and truthful person to accurately distinguish between the ideas obtained out of practical living and those intangible fancies coming in dreams, how much more impossible is it for a child, who is most of his time, waking and sleeping, under the dominion of his imagination, to be sure of what is true and what is false? Before we bring any child to account for these little tales or fancy he seriously relates to us as facts, we should investigate the sources of his belief."

Mrs. Winterburn stresses the fact that among children dreams are often tyrants. "The miseries of a child who is forced to repeat in dreams," she writes, "in an exaggerated shape, the disagreeable experiences of a hard day, are things seldom taken account of by the grown people who have almost forgotten their childhood. The old-time practice among our Puritan ancestors of having a child rehearse his bad deeds before going to sleep, and often getting the punishment for them at the bedtime hour, was a deplorable misuse of authority. We should on the contrary, guard our child from trouble at night."

"In almost everybody there is a tendency toward some special type of dream," observes the article in "Psychology," "originating in a suppressed desire of some sort. It is not only our privilege but our duty to study our child and find out precisely the stuff he is made of through investigation of his dream life. Dream life is more than half the existence of children, and the wise parent may exercise deep and permanent influence over their brains by suggestions toward right."

Will Always Bring Results

Success Assured If Anything Worth While Is Advertised

Some time ago the people of Colorado Springs got the idea that there were great attractions in that place for tourists. Following up this bright idea they made spasmodic efforts for several seasons to attract visitors, but without much success. So they decided to appropriate \$14,000 for advertising. This helped, and the next year they increased the sum to \$60,000. They advertised chiefly in newspapers, all over the country. Over 58,000 autos visited Colorado Springs last year, carrying some 350,000 people. More than 50,000 more people came by train. These visitors spent about \$13,000,000 in the Colorado Springs neighborhood. Not a bad return for a \$60,000 investment! Where there is no publicity the enterprise perishes. If there is something really worth while advertising of the right sort will make a great success of it.

Supporting Mother Country

Says Canada's Attitude Is Most Satisfactory Aspect of Imbroglio With Russia

Discussing Britain's break with the Soviet in his paper, the Observer, J. L. Garvin says: "Canada has set a magnificent example in supporting immediately the action taken by the Mother Country. Canada, locally, had no grievance comparable to ours, but on the one hand Mackenzie King sees the common Imperial interest now at stake and on the other he brings Canada as well as Britain into line with the unchanged position of America. The decision of Ottawa is by far the most satisfactory aspect of the whole imbroglio."

Vancouver Island Mines

The Ladysmith Smelter is to be taken over and equipped with modern machinery to treat ores of the mines of Vancouver Island. It is expected this will mean a marked revival of operations of many old, low-grade ore properties.

You may be able to save a lot of money by not being able to buy the things you think you want.

Was Once Object of Dread

People in Olden Times Were Superstitious Over Eclipse of Sun

The fact that England is to experience, on June 29th, the first total eclipse of the sun since 1724, recalls many accounts in ancient and medieval writings of the superstitious dread which eclipses caused before their nature was fully understood.

In a thousand years there have been only 12 total eclipses of the sun in England. They occurred in 875, 885, 1023, 1133, 1140, 1185, 1330, 1421, 1433, 1528, 1652, 1715 and 1724. Between these dates legends of dreadful occurrences connected with the eclipses had plenty of time to grow up.

Astronomers of today are worried by the difficulties in the way of accurate prediction of the central line and the time of the eclipse. Four thousand years ago it would have worried them even more. Two Chinese astronomers Ho and Hsi, who failed to give notice of the eclipse of October 23, 2137 B.C., and added to their offence by being drunk at the time, lost their heads. Since their time it has always been accounted unlucky by astronomers to be drunk during an eclipse.

In the Solomon Islands eclipses of the sun are credited to the machinations of sorcerers, while in some parts of New Guinea they are regarded as portents of a good season or success in battle.

An eclipse in the Philippine Islands last year caused a great excitement among the mountain tribes, who huddled on their armour and sounded hundreds of gongs in the belief that crocodiles were rising from the ocean and eating the sun.

Shipping Salmon Eggs

The Largest Consignment Ever Made In Canada

The largest single consignment of salmon eggs ever shipped in Canada was that made by officers of the Fish Culture Service of the Department of Marine and Fisheries to the upper waters of the Fraser River in British Columbia. Fifteen million sockeye eggs, in the "eyed" stage, were transferred in specially constructed crates from the Dominion Government's fish hatchery at Pemberton on the Fraser River below Hell's Gate Canyon to the following spawning grounds in the upper Fraser: Stuart Lake, Francis Lake and the Quenel Lakes.

A Smart Frock for the Junior Miss

This chic little frock is smart in every detail and would be equally attractive if fashioned of silk, fine woollen material, or washable goods. The skirt has plaits in the front and is joined to a bodice having the modish deep V front ending in a single scallop, and there is a belt across the one-piece back. Contrasting material is effectively used for the shapely collar, front shield, and cuffs finishing the long light-fitting or short sleeves. No. 1531 is in sizes 8, 10, 12 and 14 years. Size 10 years requires 2 1/4 yards 36-inch material, or 1 1/2 yards 54-inch, and 3/4 and 36-inch contrasting. Price 20 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Has Had Wide Experience

Fortunate indeed is the person, entering the dining room of a large hotel, who is acquainted with the head waiter. Umberto Tragella, who will be the superintendent of service at the new C.P.R. Hotel Saskatchewan, at Regina, has served in the dining rooms of some of the largest hotels on the continent, including the Empress at Victoria, Hotel Vancouver, Place Viger, Montreal, Knickerbocker, Sherry and Rectors, New York, and the Gunowald Hotel, New Orleans.

New Variety of Poultry

Said to be Much More Profitable Than Barnyard Fowl

"Turken" is the name of a new variety of poultry which made its first public appearance at the Edmonton poultry show. It is not the result of a cross between the hen and turkey, as many have mistakenly supposed from the name (an impossible cross), but as a matter of fact the Turken is a cross between a domestic hen and a bird of the pheasant species bred in Russia, and whose flesh is supposed to have the turkey flavor. This Russian bird has a hard red neck like a turkey, and the progeny of the cross has the same characteristic; and this may account for the suggestion that a turkey and a hen have been successfully mated. By careful breeding on scientific lines, the strain has now been fixed, and the birds breed true to the new type.

The male Turken has a comb and crows like a cock, but talks like a turkey and walks like a pheasant.

This will probably be news, even to most poultrymen, but it is also a matter of interest to the general public, and one to which our Minister of Agriculture might well direct the attention of all poultrymen. If the claims made for turkens, that "while the flesh is similar to that of a turkey, it has more flavor and is more tender, also the legs and breast are much larger than those of an ordinary chicken, that up to twenty weeks old they are the quickest growing chicks of any known breed of table fowl, and that the pullets usually begin to lay in five months," can be substantiated, the sooner poultrymen "catch on" the better.

If, in addition, as is claimed, the chicks are extremely hardy, easily raised, mature early, and are good layers, don't require any different care or food or more of it than barnyard fowls, and are much more profitable, all the farmers and their wives will be glad to know where and how they can get a start in this new line of poultry.

Official Live Stock Annual

Study of the past is especially valuable as a key to the future. Therefore the particular interest, as well as in the record, of such a publication as the seventh annual live stock market and meat trade Review, covering the year 1926, issued by the "Live Stock Branch of the Dominion Department of Agriculture. It is indeed a vast mine of statistical information relating to the dealings in live stock of the entire country. Quantities and prices of all classes are given month by month and for the last five years year by year. The story of both our domestic and export trade is told and reviewed in the fullest detail.

British Capital Interested

Campbell Hunter, O.B.E., well known geologist and oil expert, accompanied by C. L. Fisher, representing British capital, is investigating the Wainwright and Ribstone oil fields. The Turner Valley will also be visited.

Nothing succeeds like the efforts of a man to be disagreeable.

SUNDAY SCHOOL LESSON

JUNE 12

PETER DELIVERED FROM PRISON

Golden Text: "Many are the afflictions of the righteous; But Jehovah delivereth him out of them all."—Psalms 34:19.

Lesson: Acts 12:1-17.
Devotional Reading: Psalm 34:1-8.

Explanations and Comments

1. Peter Imprisoned, verses 1-4.—Peter, James and John were the three prominent men among the apostles, and Herod Agrippa I. began his persecution of the followers of Christ by having James beheaded. Finding that this act greatly pleased the Jews, he selected Peter as his next victim and had him imprisoned to await his execution after the close of the Passover. Executions were not carried out during the Passover, and Herod was nominally a Jew and most careful in all Jewish observances. Peter was guarded in prison by four quarters of soldiers, four sets of men, one set for each watch, two of whom were chained to Peter in his cell, and two were on guard outside, verses 5-6.

"When a man finds that in certain course of conduct he is receiving popular applause he is led on to further excesses. A public speaker descends to a coarse and vulgar jest, and because it pleases the baser sort in the audience, and the speaker is awarded a round of applause, he is prone to descend to still farther depths of degradation."—Dr. J. H. Jowett.

11. Peter's Deliverance, verses 5-11.—Peter was in prison, but prayer was made earnestly of the church unto God for him.

"I wish I could burn these two words, unto God, into every heart, so that whenever we pray, in public or in private, they would stand right before us; and that before we prayed a syllable of prayer we would be sure every time that we had really come into the presence of God and were actually talking to him."—R. A. Torrey.

At night, shortly before he would have been brought forth for trial and death, help came. "There is the enemy plotting; there are the friends praying; and the man himself around whom all the menace and the intercession are gathering has shut his eyes and quieted himself to slumber, because there, too, is he who neither slumbereth nor sleepeth. God is there in the palace, there in the house of prayer, there in the prison, keeping all the threads of the drama in his own hands; holding the tyrant's power in derision, hearing the prayer that ascends to his holy habitation, responding to the trust of his child, when the child is lulled to sleep. And now it is time to work. The final act is ready to be launched on the stage. The moment of deliverance is appointed, and already its messenger and instrument is on the wind to loose him that is appointed unto death. How well may Peter sleep when God is watching over his bed and preparing his awakening!"—Robert Law.

The circumstances of Peter's escape are told very minutely—the coming of the angel (the word angel means messenger), the light in the cell that awakened Peter, the brief words to make haste, the falling off of the chains, the girding and putting on of sandals and outer cloak, the command to follow, the passing of the first and the second guard, the opening of the outer gate of the prison leading into the city, the going out and passing through one street, and then the being left alone.

Peter was dazed and thought, his experience until he "came to himself" and said, "The Lord hath sent this angel and delivered me out of the hand of Herod." One thing is certain, whoever delivers us from a great peril will always seem to us an angel. "There are no bolts and there are no bars which can withstand the purposes of God."

New Use For Helium

May be Substituted for Nitrogen in Air of Diving Bells

When helium was first discovered it was considered a sort of scientific toy, and was obtainable only in extremely small quantities. Then it was produced in quantity sufficient to take the place of hydrogen in airships. Experiments are now in progress to substitute it for nitrogen in the air of diving bells, for the nitrogen under high pressure enters the tissues of the bodies of the divers, and when it escapes during the ascent causes severe lacerations. The discovery has an economic value for with helium it will be possible for divers to descend to the bottom of the Bay of Vigo and secure millions of gold from sunken Spanish galleons.

Sacrifice Reindeer

Word comes from northern Siberia that the natives of Arctic villages, thinking that the angry gods have decided there shall be no summer, are killing scores of precious reindeer as sacrifices. It is unusually cold there, the warmest lately being 35 degrees below zero.

Flin Flon Mine

The \$750,000 concentration plant at the Flin Flon mine in Northern Manitoba has begun operations and 20,000,000 tons of ore have already been blocked out, according to the Winnipeg Board of Trade, which is actively supporting the construction of a railway into this area.

Do you know of anything that is harder to get than easy money?

What's in a Name?

Would you buy canned goods that bore no label? Would you buy an automobile of unknown make, no matter how cheap? Nobody would be so foolish.

You get to trust a name or a label just as you get to trust a man, through satisfactory and honest dealings. That is why kitchen and household utensils bearing the SMP label are bought without question by millions of Canadians. The shield-shaped green and red SMP trademark is a guarantee of full value and best quality. The firm behind SMP goods is

Saskatchewan Egg Pool

Farmers' Wives Constitute the Board of Directors

The women of Saskatchewan are winning their spurs in the egg and poultry field. At the first annual meeting of the Saskatchewan Egg and Poultry Pool, the directors of which, all but one, are wives of farmers, the report of the year's business showed a turnover of \$537,177. The Pool began business at the end of March, 1926. During the year it handled 1,199,847 dozen eggs and \$10,000 lbs. of poultry. At the close of the year the pool had paid up share capital amounting to \$12,574 and a reserve of \$7,700. The membership is approximately 16,000.

Soldier Settler Lands

Movement Started for Re-valuation of Holdings in Saskatchewan

Machinery for the revaluation of soldier settler lands throughout the west, long awaited, was set in motion for Saskatchewan when the start was made in the Regina office of the board to send 2,500 letters to soldier settlers. With the letters went forms of application for re-valuation and these must be filled in by the settlers and returned to the board by October 1st.

U.S. Immigration to Canada

Analysis of United States Immigration to Canada for the last fiscal year discloses that Michigan was the heaviest contributor among the States of the Union with 2,861 new citizens. New York and Washington tied for second place with a total of 1,827 each. Following came Minnesota with 1,475; North Dakota, 1,239; California, 1,202 and Massachusetts, 965.

Big Oil Refinery

Work will begin at once on the construction of the first mill at Wainwright, Alberta, of a ten-thousand-barrel-a-day oil refinery, according to R. A. Price, president of the Price Development and Mining Co. Shipments of lubricating and tractor oil will begin before September.

Was So Nervous The Least Noise Made Her Jump

Mrs. W. H. Yates, Ashern, Man., writes:—"I was bothered very much with my heart and nerves, and the least noise would make me jump and almost stop my heart beating."

I told my mother about it one day, and she said that she had been bothered the same way and told me to get a box of

When I had taken the one box I felt quite a lot better and by the time I had taken three boxes I got relief." Price 50c. a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Landing In Germany Chamberlin Established New Distance Record

Berlin. The Hellanca monoplane was forced down at Elshoben, 25 kilometres from Halle, at 9:30 a.m. (4:30 a.m. Eastern Daylight Saving Time). Machine and passengers were in good condition. The landing was attributed to a shortage of gasoline or the fact that the pilot, Clarence H. Chamberlin, lost his way in the rainy weather.

The Hellanca plane was refueled and started immediately for Berlin.

The Columbia was sighted over Magdeburg, 80 miles southwest of Berlin, on her way to Berlin from Elshoben, where she was forced to land.

Before she landed the Columbia had been in the air since 4:05 a.m. Saturday—a total flying time of 46 hours and 25 minutes.

She established a new distance record, beating the mark established by Captain Charles Lindbergh in his flight to Paris.

Halle is 100 miles southwest of Berlin.

The Columbia was sighted over Dortmund at 4:08 o'clock. Dortmund is 240 miles from Berlin. The Columbia dropped very low over Dortmund, Chamberlin calling out, "To Berlin." The police gave him his direction.

As daylight began to appear shortly after 4 o'clock, additional crowds surged toward Tempelhofen Field, where Chamberlin was expected to land, were so great that it was necessary to call out fresh police reserves. Rain had commenced to fall.

A big cloudb of bright red fires reached the outskirts of the field, while powerful searchlights of two towers beamed to the west stand as beacon lights to guide the aviators. At midnight a circle of white lights encircled Tempelhofen Field.

The splendid weather early lured thousands to the neighborhood of the field, where the crowds found to their disappointment they could only approach to within 1,000 yards of the landing ground, but such was their enthusiasm that they patiently remained standing from 10 o'clock at night, curiously watching the automobiles with aviation officials and an army of newspapermen as they dashed in and out of the grounds to which admission was by card only.

Reach Amicable Settlement

Britain Waives Claims for Detention of Shipping During War

Washington. Claims of the British Government and its nationals against the United States for seizure and detention of shipping during the world war have been waived by Great Britain. It was disclosed with publication of notes ratifying an agreement reached two weeks ago.

In return the United States Government agrees to pay claims of American owners against the British which might result from settlement in the British courts but which the United States Government regards as meritorious.

British claims which the United States Government has recognized as just are understood to total approximately \$1,000,000, with others for which liability has not been conceded reaching a higher figure.

Cut-Off Date for Pool Wheat

Regina, Sask. The directors of the Saskatchewan Wheat Pool have set July 15 as the cut-off date for the 1926-27 crop. It was officially announced. All stored grain delivered and settled for by cash ticket on or before July 15 will be included in the 1926-27 pool. For earlier grain all grain not loaded out by July 15 will be carried over into the 1927-28 pool.

Russia To Be Permitted To Continue To Carry On Trade With Britain

London. Sir William Joynton-Dicks, Home Secretary, in a statement to the House of Commons regarding the conditions under which Russians will be permitted to trade in Britain, said that the British government had no desire to place any difficulties in the way of trade between Russia and Great Britain. Russians who desired to come to Britain for the purpose of bona fide trading, he said, would be accorded the same facilities as the nationals of any other foreign power.

For a Better Understanding

Appreciation of Needs of All Portions of Canada Required Says Beatty

Vancouver. "In this year which we celebrate the Diamond Jubilee of the Confederation of Canada, our greatest contribution to the memory of those courageous Fathers of Confederation should be a greater understanding of the needs of those portions of the country in which we ourselves do not live," said E. W. Beatty, president and chairman of the Canadian Pacific Railway in an address given at a combined luncheon of the Canadian Club and the Vancouver Board of Trade.

"National characteristics are backed by greater resources heretofore undeveloped," said Mr. Beatty. "The first is the tremendous areas of agricultural lands producing the finest wheat in the world, and not less important vast areas of equally good arable land as yet untouched by the plow."

"It is estimated, in fact," continued Mr. Beatty, "that only from one-twelfth to one-eighth of the country's agricultural lands have as yet been cultivated. The second is its also in limited water powers. I doubt if there is any other country in the world so plentifully supplied with power development as is Canada, and every one realizes that this means as a factor in industrial expansion."

"The third is its forest wealth, which already has enabled it to conduct lumbering operations, the annual output of which exceeds \$145,000,000 and to produce pulp and paper to the value of \$200,000,000."

"Then there are its mineral possibilities, the potentialities of which are very great enabling it to produce gold, silver, nickel, zinc, lead and copper to an aggregate value in 1925 of \$113,000,000."

International Bridge Opened For Traffic

Formal Dedication of Peace Span Takes Place in September

Buffalo, N.Y. The new international peace bridge spanning the Niagara River between Buffalo and Fort Erie, Ont., was opened to traffic June 1 with simple ceremonies of the two countries which it connects.

Properly at the time set for the opening, automobiles containing officials of the bridge company and Buffalo public officials, led by Mayor Frank K. Schwab, left the United States end of the structure for the Canadian side. There, they climbed around the peace bridge placed on Canadian officials headed by Reeve Louis Douglas, of Fort Erie, and returned to the American side.

Display and ceremony was lacking. That will come probably in September when at the formal dedication of the \$450,000 span, high officials of the Canadian and United States governments will take part. President Coolidge has been invited and sponsors of the ceremony expect the attendance of the Prince of Wales and Premier Baldwin of Great Britain as well as Canadian executives.

To Represent King at Service

London. Their Majesties the King and Queen will be represented by the Duke of Connaught, at the great service in Westminster Abbey, on July 1, in celebration of the Diamond Jubilee of the Canadian Confederation. The Canadian Press is officially informed. Their Majesties will not be able to attend the service as they will be engaged in Scotland at that time.

Appeals For United Canada

Should Keep Soviet Agents Out Says Sir Henry Thornton

St. Thomas, Ont. Sir Henry Thornton, president and chairman of the Canadian National Railways, in the course of an address before the business men of this city, suggested that agents of Soviet Russia should steer clear of this country and permit Canadians to build a united, contented and prosperous dominion.

"This action is founded upon the fine traditions of the Anglo-Saxon race. Its jurisprudence embraces the fine principles of the English law and fair play," Sir Henry said. "We are essentially a law-abiding people, and we want no element to come in and disturb that condition."

"Whatever others may think about other forms of government and about visionary schemes of society, it may conservatively be described as distinct and unique and if any communist wants to come here and raise the slaves, we should inform them that we can do the waking of these slaves ourselves."

U.S. Pilot Lost Bearings

Went 145 Miles off Route Between Montreal and Ottawa

Ottawa. After being in the air for five and one-quarter hours, having lost his bearings and gone more than one hundred miles off his route, Captain R. G. Hoyt, piloting a United States army goodwill plane, landed at Ottawa. In leaving Montreal the aviator mistook the St. Lawrence River for the Ottawa River, he said, and after following the former stream for some hours, came to earth to regain his bearings and discovered he was 145 miles off his route.

The final landing in the capital almost proved disastrous. The field adjoining the Dominion Experimental Farm on which the plane came to earth was rough of surface and in gliding down the plane suffered a smashed wing and badly crumpled landing gear. But Captain Hoyt and Sergeant B. D. Booser, who accompanied him, escaped injury, however.

Debt Settlement Explained

Statement Removes Any Question of Misunderstanding Between Britain and U.S.

London. The Foreign Office has issued a statement regarding the war claims settlement notes between Great Britain and the United States exchanged on May 19. "The result of the efforts of the two governments," says the statement, "has been not only to provide a satisfactory disposal of the outstanding claims, but also to remove permanently from the field of diplomatic controversy questions which it persisted to remain unsettled might have arisen later to embarrass the cordial relations now happily existing between Great Britain and the United States."

Princess Mary Christens Ship

London. Princess Mary christened the Canberra which was launched on the Clyde in the presence of a large gathering amidst considerable enthusiasm. The Canberra, named after Australia's new capital, is the second battle cruiser built on the Clyde for Australia in a few months. The first cruiser is now being fitted out.

Plan Big Elevator

Vancouver, B.C. The Province says: "Construction of a 1,500,000 bushel grain elevator to cost approximately \$2,000,000 will be commenced here shortly by the Alberta Wheat pool, according to announcement from Calgary."

Canadian Minister Welcomed In Kentucky

Addressed English-Speaking Union on "Exploits of Neighborliness"

Louisville, Ky. The Union Jack and the Stars and Stripes proudly fluttered over the heads of 150 members of the Kentucky branch of the English-speaking Union, while Hon. Vincent Massey, Canadian minister to the United States, spoke on "Exploits of Neighborliness."

"I am glad English-speaking folk are learning that we may be good neighbors and good neighbors at the same time," he said. He praised the English-speaking Union for its work in promoting comradeship and good feeling between peoples and paid a tribute to the Kentucky branch.

Judge R. W. Bingham, honorary president of the Kentucky organization, presided at the luncheon. He characterized England as the "most important entity in the world."

"By England," he said, "I do not mean a small island off the coast of Europe. I refer to the state of mind of the English-speaking people throughout the world who have wrought for themselves a condition of religious, political and social freedom without losing that supporting attitude toward life which is the characteristic of the race."

Getting Branch Line Work Under Way

C.N.R. Anxious to Have Lines Completed Says Vice-President

Winnipeg. "We are forging ahead with the branch lines," said S. J. Humberford, vice-president in charge of operating of the Canadian National Railways, who arrived in the city from Montreal.

"As quickly as the contracts can be let, the work is getting under way," he added.

"The system was anxious to get the lines completed and serving the public as soon as possible," he said, and a good deal of the work would be done this year. Mr. Humberford was not prepared to say anything regarding new development, and knew nothing of any projected lines into Manitoba's central mining areas.

The vice-president was here on one of his periodical trips for conference with western region officials.

Holland and Belgium Swept By Cyclone

Forty Persons Dead and Many Injured in Storm

Amsterdam, Holland. Forty persons were killed, 150 injured, and enormous damage done by the cyclonic storm that swept over parts of Holland and Belgium. Besides three villages devastated, Noede, Brounlo and Helden, nine others were extensively damaged.

In the Brussels-Antwerp district of Belgium there was much damage, especially to hot houses for which the section is famous. The wind tore roofs from houses, uprooted trees, and a number of buildings weakened by the storm, collapsed.

Meeting Mast Location Still Secret

Ottawa. Pending submission of the report of the British experts who have toured Eastern Canada, government officials are maintaining strict silence over the probable location of the meeting mast to be erected in Canada for the trans-Atlantic dirigible service. The report of Major G. H. Scott, the British expert, is expected to be in the hands of the Government shortly.

Vast Sum Required To Develop Harbor For Hudson Bay Road

Japan Anxious For Peace

Ready to Reduce Navy to Minimum of Defence Requirements

Tokyo. Japan's acceptance of President Coolidge's invitation to the maritime conference on the limitation of naval armaments was inspired by a genuine love for peace and a sincere wish to co-operate constructively with the other powers, said Admiral Okada, Minister of the Navy, in an exclusive statement to the Associated Press.

He emphasized that his country was ready to reduce its navy to the minimum of defence requirements, and with this end in view would engage in a frank discussion with the delegates of Great Britain and the United States.

"If anybody thinks we simply jumped at this opportunity to limit armaments for financial reason," he declared, "he has never learned to appreciate our true feelings. Our naval institution actually far from being of aggressive proportion was never intended to extend beyond the measure justified by defence. Even without this armament parity, we never thought of building beyond this. So we are looking forward to the forthcoming conference as something in the way of a formal occasion to confirm this fundamental idea."

Manxmen to Celebrate

Possibilities of Increased Immigration to Canada Will Be Discussed

New York. Five hundred Manxmen residing in Canada and the United States sailed from Montreal June 3, for a four weeks homegoing celebration on their native soil, the Isle of Man, famous for its falconry and ancient for its self-government. Possibilities of increasing Manx immigration to Canada and the United States will be among subjects to be launched up at the celebration on the island.

Grazing Permit Cancelled

Ottawa. Experimental importation of reindeer to Baffin Island has proved a failure, according to advice received by the Department of the Interior from the Hudson's Bay Reindeer Company, Ltd. For this reason, and on the application of the company, an order-in-council has been passed cancelling a grazing permit originally granted to Villgum Stephenson, Canadian Arctic explorer, for reindeer and other herbivorous animals on a portion of the south coast of Baffin Island.

Settlers From U.S.

Winnipeg. A party of 26 farmer-settlers from the United States recently arrived in Winnipeg with several thousand dollars each to invest in land on the prairies. The settlers, the first party to arrive here from the South this year, left for the West to look over prospects in districts of Saskatchewan with a view to finding locations. They came from Kansas, Nebraska and North Dakota.

Says General Conditions In The West Were Never More Promising

Calgary. At the 56th annual general meeting of the Canadian Manufacturers' Association, an optimistic note was struck by the chairman of the prairie division, T. N. Clayton, Winnipeg. In his review of conditions in the prairie provinces,

"General conditions in Western Canada were never more full of promise," he declared. "We are looking forward confidently and with justification to rapid development in the immediate future. Our primary industry, agriculture, has made tremendous strides in past three years and established itself on a firmer basis than ever before. Although weather conditions have been adverse this year and the average sown will very likely show a decrease from last year, yet there is no reason why we cannot expect a bountiful harvest."

"Probably no work of the association in the prairie provinces," said Mr. Clayton, "shows more encouraging results than the 'Produced-in-Canada' campaign. During the past year it has been adopted by the public generally. One no longer hears the statement that one might better buy

Ottawa, Ont. Only the simplest part of the project is covered by the engineers' estimate that it would cost \$7,542,000 to complete the Hudson's Bay Railway to Fort Churchill and leave \$500,000 for railway terminals. The most difficult and expensive part of the work is actually at the Bay, where docks, terminal elevators, aids to navigation and millions of dollars worth of dredging will have to be done before the Hudson's Bay Railway will be a factor in the movement toward the markets of the world of western Canada's grain, cattle and other products.

Already more than \$20,000,000 has been spent on the railway, including development of the port at Nelson, dredging and other work of the latter point having cost more than \$6,000,000. There is some doubt now whether Nelson will be abandoned in favor of Churchill and the point will not be definitely settled until the Government receives, about the end of the summer, the recommendations of Frederick Palmer, eminent British engineer, who has been engaged to make reports on both Churchill and Nelson and the navigability of the strait.

It will cost some \$5,000,000 more to build the railway to Churchill as against Nelson, but it is surmised that the cost of port development at Churchill would be much lower than at Nelson. No matter what port is finally decided upon, the grain elevators, aids to navigation, and the construction of docks to provide accommodation for several ocean going vessels to be in port simultaneously, will bring the aggregate cost of the Hudson's Bay Railway scheme up to \$20,000,000 in the opinion of competent engineers.

A Giant Photograph

Will Take Photograph of Newfoundland From the Air

New York. A giant photograph of 22,000 square miles of Newfoundland is to be taken from the air and placed together in the most thorough search yet to be undertaken for the missing French aviators, Nungesser and Goh.

It is believed this photograph will definitely establish whether or not the crew of France's White Bird succeeded in crossing the ocean and went down in Newfoundland.

Premier of B.C. Recovering

Hamilton, Ont. Hon. John Oliver, Premier of British Columbia, who was convalescing at the home of his son here for some time following an operation he underwent at Rochester, Minn., has so far recovered that he left on an automobile trip to Gray County to visit relatives.

Would Advertise Canadian Foods

Ottawa. The Canadian Horticultural Council has placed before the federal department of trade and commerce a proposal respecting participation in the scheme for advertising of Canadian food products in Great Britain.

Delightful Holiday Location

Algonquin Park, in Ontario, is one of the Dominion's charming holiday spots, particularly for the lover of fishing, canoeing and other aquatic sports. Here a canoeist is shown making his way through the passage which leads into St. Andrew's Lake, one of the beauty spots of this delightful holiday resort.—Canadian National Railways photograph.

Vast Possibilities In Reindeer

Canadian Company With Headquarters at Vancouver Going Into Business

Raising reindeer for commercial purposes in Canada will be an established fact this year. The Dominion Reindeer Company, with headquarters at Vancouver, has imported 5,000 head of reindeer from Alaska. This herd will be located on the vast grazing areas between the Athabasca and Great Slave lakes, north of Edmonton, where the company has secured over three million acres.

The company plans to establish a packing plant at Fort McMurray and ship the reindeer meat and by-products to Edmonton for redistribution.

It is stated there are vast possibilities for this industry in Canada. As yet reindeer meat is practically unknown as an article of food in the Dominion, but it is stated to be first-classing favor in the United States.

In the last few years over 2,000,000 pounds of reindeer meat were consumed in the United States. The meat is claimed to have a flavor between that of beef and mutton. The males, except a certain number which are set aside for breeding purposes, are fattened as steers and butchered when 2½ years old. The carcasses are then chilled and shipped to distribution points.

The cost of raising these animals is stated to be practically nil. A full grown reindeer will give 165 pounds of marketable meat. Besides meat these animals furnish a large number of valuable by-products such as tongue, cheese, glue, leather, fur, buttons, knife handles, hair for life preservers and horse collars.

Reindeer herds double every three years according to authorities. Recently 1,250 reindeer were brought in to Alaska from Siberia by the United States Government in 1902. The largest single herd of their descendants now numbers 70,000 and the total number in Alaska is estimated at about 500,000.

The First Locomotive Whistle

Invention Came About Through Destruction of Load of Eggs

The destruction of a load of eggs on a country crossroad in 1833 was directly responsible for the invention of the first locomotive whistle, according to E. W. Merderson, mechanical draftsman of the Maine Central Railroad, who said that this important piece of railroad history had been imparted to him by a prominent railroad official.

When country roads were all crossed at grade and when people used to sit on their doorsteps and watch the ox carts whiz by, Mr. Merderson said, locomotive engineers had no way of giving warning of their approach except by blowing a tin horn, and naturally the engineer's lung capacity determined the volume of sound in giving warning of approaching trains.

The story as told to Mr. Merderson was that on one spring day in 1833, a farmer approached a railroad crossing on his journey to market with a load of eggs and butter. Just as he came upon the track, a train approached rapidly. The engineer blew his horn but the farmer was so deeply immersed in pounds and dozens, shillings and pence, that he did not hear it.

Crash! Dozens of eggs and pounds of butter were transformed in a twinkling into an unrecognizable, widely distributed over the right of way.

A claim agent checked up on the case, resulting in the railroad company paying the farmer the value of his butter, eggs, horse and wagon.

A director of the company, Ashland Baxter by name, went to Alton Grange where George Stephenson lived, to see if he could not invent something that would give a warning more likely to be heard. Stephenson went to work and the next day he had a contrivance which, when attached to the locomotive boiler, and the steam turned on, gave out a shrill, discordant sound.

The railroad directors, greatly delighted, ordered similar contrivances attached to all the locomotives. This has developed into the locomotive whistle as we know it.

The British people ate on the average 33 apples a head in 1926. If they continue to increase their consumption of the fruit toward the proverbial apple a day, Canadian farmers will be gratified.

Some men waste a lot of time wishing it were tomorrow.

"Reggie isn't going to marry Dolly after all."

"But I thought he fell in love at first sight."

"But he took a second look."

W. N. E. 1634

Adopting Britain's Attitude

Canada Stands With Mother Country on Soviet Question

Having taken her stand with Britain in the abrogation of relations with the Soviet, Canada will not retreat. The position of the Dominion Government is that the dramatic appeal of the Soviet agent at Montreal for reconsideration and an opportunity to prove that Moscow is innocent of double-dealing and violation of the terms of the Trade Agreement could not be entertained for one moment.

Canada will stand shoulder to shoulder with Britain and the Dominion Government's official notification to the Soviet makes it quite clear that when the Motherland throws down the gauntlet Canada will follow. The Soviet will learn what the Prussian War Lords learned in 1914: that the British Empire acts as a unit. The decision of the Canadian Cabinet to sever relations with the Moscow Reds is final.

If the Soviet wishes to buy Canadian goods the Government does not object so long as the transactions are concluded privately. But until the Soviet learns to mind its own business while enjoying the hospitality of the British Empire, the Dominion of Canada will be content to see diplomatic relations severed.

The official note was likely in more diplomatic language, but that is what it meant in plain English.

Claim Growth Stunted By Heavy Portaging

Tribe of Indians Live on Shores of Island Lake in Manitoba

A tribe of very short, broad Indians who claim to have been stunted in growth because they have had to make long, heavy portages all their lives, dwell in isolation on the shores of Island Lake in Northern Central Manitoba.

Dr. J. E. Wright, of the geological survey, Ottawa, who has seen some of these Indians, says the tallest of them would not be over five feet five inches high, while they are all heavily built and strong.

The Indians live in almost complete isolation at two separate villages on a strange lake dotted with about 2,000 islands, from which it takes its name, Island Lake. They rarely go as far south as Lake Winnipeg, but do all their trading with the Hudson's Bay Company at Norway House.

Dr. Wright will join Dr. J. C. B. Grant, professor of anatomy at the University of Manitoba, and the two scientists will travel together to Island Lake, the former to investigate stunting possibilities in the surrounding country and the latter to investigate the physical peculiarities of these almost unknown Indians, for the national museum.

Commercial Planes For Atlantic Flights

Fokker Predicts Service Will Start Within Five Years

Anthony Fokker expresses the opinion that within five years Paris-New York flying will be on a commercial basis.

But non-stop flights, such as are being attempted now, will not be in order of the day then, he thought. These men are trail blazers, and those who follow will need an easier road.

"I think the great circle course will be followed by these commercial planes," he said. "And there will be stops at Newfoundland, at Ireland, and at London on the way. The whole trip should not take more than 36 hours, as by that time engines will have been improved and ordinary speed raised to 150 miles an hour."

Development of better instruments and safety devices in the immediate years, Fokker asserted, would result in practically eliminating the difficulties which weather now places in the way of long distance flying.

Looking for Information

A woman engaged a new maid, who seemed to be self-posessed and independent.

On the first morning after her arrival not a sound was heard in the house, so the mistress rang the bell. There was no reply. Finally she called up the stairs:

"Are you awake, Mary?"

"Yes, rather," answered the maid.

"Why?"

"Turkey to be represented."

Still another country is to be represented at the world's Poultry Congress to be held here July 27th to August 4th. Word comes that the International College at Smyrna, Turkey, is sending an official delegate.

Ice-man—"Yes, sir. This is the best ice in town."

Mr. Jones (absently) — "Will it leave clinkers in the lexbox?"

Up-to-Date Police Cars

Built for Scotland Yard Warfare on Motor Bandits

Twenty of the fast British motor cars which have been built to the order of Scotland Yard to help the intensive warfare planned against motor bandits will shortly be tested on the Brooklands race track before higher officials of Scotland Yard.

The cars are stated to be capable of a speed of 80 miles an hour, and each can seat six men. They are to be used solely by the Criminal Investigation Department.

Two devices are carried on all cars. One is an aluminum fire bell fixed under the bonnet and operated by a disc from the steering wheel. The other is a sign bearing the words "Metropolitan Police," which can be illuminated at night.

This device is fixed under the canopy of the car and by a switch can be made to shoot into a position in which it can be seen as the car speeds along. Ordinarily this sign will not be visible.

It has often happened that raiders out-distanced police vans which have been chasing them. Under the new scheme the chaser cars of the police will have the right of the road. The clanging of the bell and the showing of the sign will warn people anxious to stop the law-breakers, and will also be a warning that any car evading the signals is likely to contain the suspected persons.

The cars will prove, it is thought, most valuable in stopping the repeated raids in the suburbs by men who return to London at the end of each raid and who have been known to sweep through police cordons.

Cannot Sue Their Clients

French Lawyers Ace Bound By Ethics of Profession

French lawyers can sue everyone except their own clients, and not all of them like the situation.

Young Maurice Barreau, newly come to the bar, has brought this state of affairs to light, by blowing the dust of tradition and demanding that lawyers should have the right to collect their fees, just as they collect debts due others.

The Council of the Order, governing the Bar Association, however, still stands fast to the ethics of the profession. It shows no inclination to allow the law profession to sink to the level of mere trade, in which a businessman sues when his customers fail to pay.

Learned the Reason

Forbes Magazine tells of a colored agent who was summoned before the insurance commissioner. "Don't you know," said the commissioner, "that you can't sell life insurance without a State license?"

"Boss," said the man, "you sush said a monthful, I knowed I couldn't sell it, but I didn't know the reason."

Interesting Youthful Stock Breeders

Following the lead taken by the Provincial Cattle Association in increasing the youthful breeders of the province in calf competitions, the horse breeders will have a like event during the Provincial Fair for boys who excel for and fed colts at least six weeks prior to the exhibition.

Aluminum, which forms a part of all clay soils, is the commonest of all metals. Its high cost compared with iron is due to the difficulty of extracting the metal from the ore.

A broken promise may be mended but it always shows the crack.

Alfalfa For Ranching Lands

Growing Forage to Supplement Native Vegetation

Already the stock raising industry in Saskatchewan and Alberta is suffering as a result of overgrazing due to the advent of the dry farmer and the consequent reduction of ranching areas. The remedy for this situation recommended by Dr. McRostie, Dominion Agronomist, is to be found in the correct use of alfalfa.

In circular No. 53 prepared by Dr. McRostie and S. E. Clark, his assistant, it is pointed out that the majority of ranchers over the area under consideration are faced with the alternative of either disposing of a portion of their livestock, or growing some forage crop to supplement the native vegetation. To assist them in following the latter plan this pamphlet has been prepared and points out that while the greater part of the ranch lands are too dry for the successful cultivation of many forage crops, most ranches have at least a small area which is favorably located with regard to moisture than is the surrounding area. On such areas irrigation is sometimes practiced. In a few localities the natural water table is near enough to the surface for such deep rooted plants as alfalfa. Here this crop does well without the artificial lying on of water. The pamphlet, available at Publications Branch at Ottawa, gives many reasons why alfalfa should be grown and how to grow it, covering soil requirements, preparation of seed, seedling during the first season, harvesting and subsequent treatment.

The pamphlet, available at Publications Branch at Ottawa, gives many reasons why alfalfa should be grown and how to grow it, covering soil requirements, preparation of seed, seedling during the first season, harvesting and subsequent treatment.

Population of World Increasing Rapidly

Has Doubled in Last Hundred and Twenty-five Years

According to statistics of the League of Nations, the earth's population has doubled since the beginning of the nineteenth century. In 1800 it was less than 850,000,000 while today it is in the neighborhood of 1,800,000,000. The present increase amounts to from 1 to 1.2 per cent a year. Therefore, on the basis of 1 per cent a year the earth's population will in 1970 amount to 2,270,000,000; in the year 2020 it will be 1,592,000,000; a hundred years after that it will be no less than 12,577,000,000.

The epidemics and pestilences that in the middle ages decimated the population have now for many years been so abated as to have comparatively little effect upon the increase of the race.

Many U.S. Settlers Coming

The invasion of Canada by American settlers who appreciate the opportunities for farming in this country promises to be considerably greater this season than for some years. They are coming from all over the middle-western and north-western states, and it is said that some 250 Michigan farmers are spying on the Canadian West or will do so during the year.

Told in Few Words

Short and snappy is the following news item which appeared in a Shanghai newspaper: A carpenter picked up a bomb in Chapel yesterday. He showed it to some curio collectors. He threw the bomb on the ground. He won't pick up any more bombs. They won't collect any more curios. The account was headed: "Bomb does its stuff when treated rough."

The London Policeman

Must Possess Some Leniency to Quality for the Force

The London foot policeman's lot, like that of his mounted colleague, grows no happier. How would the average newspaper reader rate in the "how much do you know?" line when up against the following questions included in the "general knowledge" examination of a first-class constable?

"By what characteristics of appearance, speech, dress or manner could you tell an American, an Australian, a Frenchman or Italian in a London street?"

"What do you know about the Washington Agreement, the Third International, the British Legion, Witley Councils, the Fascist and the Geneva Protocols?"

"Write short notes on any three of the following: Lord Allenby, Mr. J. H. Thomas, E. Henderson, Mark Twain, Signor Mussolini, Marie Curie, Jack Dempsey, M. Trotsky." The examination includes a searching problem in psychology: "Is there any truth in the statement that the criminal is born, not made? Illustrate as far as you can from your own experience." After this one begins to understand why Sir Leonard Bunning, Inspector of constabulary, in his annual report to the home office, asked the public not to offer tips to policemen, who may be classical scholars as well as fluent linguists; and one learns without surprise that not a few men who regulate the traffic in London streets, and so politely answer so many perplexing inquiries, are university graduates.—New York Herald-Tribune.

Good Country for Canoeist

No Other Place Offers Such Attractions as Canada

Never a country had such a canoe, and never canoeist had such a country as Canada. At hundreds of railway stations and steamboat landings the canoeist can drop his craft into the water and in an hour have penetrated so far into the wilderness that apparently no sound more modern than the howl of the moose or the cry of the loon has ever broken its primeval stillness. Alarm clocks and telephones and suburban trains are forgotten; time is measured by meals and sleeps; for what an appetite even a dyspeptic has on a canoe trip and how the victim of city sleeplessness enjoys that blissful slumber on a "couch of new-pulled hemlock" in the wilderness!

Longest Canal Tunnel Opened

The longest canal tunnel in the world, connecting the Port of Marseilles, France, with the large inland salt water lake Etang-de-Berre, has been formally opened. Marseilles is thus brought into direct water communication with the River Rhone. The tunnel is four and a half miles long, 47 feet high and 70 feet broad. Seagoing vessels are able to proceed through it.

Prince Has Many Doubles

Doubles of the Prince of Wales are numerous, and another has turned up—this time in London. People cannot help looking like His Royal Highness, but some of them take advantage of the fact. It is not unusual for the Household to receive bills for meals and so on in places which the Prince has never entered in his life. He must have at least seven or eight doubles.

Gossips have no use for people who refuse to furnish material for them.

Warning To Bolshevism

United States Ambassador to France Refers to Paid Propaganda

The United States ambassador, Myron T. Herrick, speaking at the United States military cemetery at Suresnes, France, declared the ruling powers of Soviet Russia were engaged in paid propaganda activities throughout the world and that the United States would not tolerate the spread of Bolshevism to its shores.

Declaring modern scientific methods were being applied to the scourge of war, the ambassador said these modern scientific methods are now "somewhat belatedly being actively applied to the scourge of Bolshevism."

"I believe," he continued, "that the people in every country have got to choose between order and anarchy, between honesty and thievery, between everyday virtue and crime. Either we believe in orderly society or we don't. If we do, we ought to use all the power within us to defeat and advance it. The impudent, mischievous interference of paid, organized propaganda throughout the world has gone steadily on and, in common with others, I have been forced by these events to view with increasing apprehension this sinister movement."

Declaring the leaders of the Soviet regime do not speak for the great masses of Russian people, Mr. Herrick said the Bolshevik system thus far seems to the world in general more tyrannical and oppressive than any preceding despotism.

"We have no thought of attacking the Soviet regime in Russia. What it does on its own 'reservation' is its own affair. But we do object with all the earnestness of a self-respecting nation, and quite regardless of material considerations, to give to its leaders the means and opportunity of poisoning us. We intend to protect our country from Bolshevism and the fact that a Government secretly sends against us the germs of a loathsome malady instead of openly dispatching armies does not make the invasion less felonious or alter our duty to repel it."

Eskimos Enjoy Radio Program

Reception is Usually Very Good Near Arctic Circle

In far away Akavik, somewhere near the Arctic Circle in the North West Territories, the Eskimos no longer huddle at night in their igloos.

For in Akavik, 1,800 miles north of Winnipeg, voices from Canadian radio stations make themselves heard on certain nights when Aurora Borealis is in good humor. Then the dogs cease to howl at the painted sky and the Inuit flappers and shelds gather on the frozen snow to dance to strains of orchestras.

Lieut. Kniff, who is stationed at Akavik on government work, sends this information by telegraph to the Manitoba government station.

The lieutenant has a good radio set with a loud speaker, and on nights when conditions are favorable he tunes in Reception is usually good, he says, and the concerts are much enjoyed.

The Eskimos, he says, are keen fans and look forward to the coming of the "voice from the sky." As the Eskimo, as a rule, is keenly appreciative of white men's music and quickly learns to dance in the modern way, they thoroughly enjoy the concerts and dance music. Lieut. Kniff writes.

Suited to Timber Crop

Only Economic Use for Three-Eighths of Canada's Land Area

It is estimated by the Forest Service of the Department of the Interior that the only economic use for three-eighths of the land area of Canada lies in growing of trees. This vast area of territory, while incapable of successful agricultural production, is, if permanently dedicated, protected and managed, suited to the production of a timber crop which would guarantee for all time the supply of raw material for Canada's wood-using industries.

Camels Once Roamed Over America

Camels are commonly understood to belong exclusively to the Old World. It was not always so, however, as a specimen recently acquired by Canada's National Museum at Ottawa amply demonstrates. This is the fossilized frame of a camel which a few million years ago roamed over the western plains of North America which were then dry. This curious specimen has been placed on exhibition in the Hall of Paleontology.

The Rev. Mr. Saythe—"Of course you expect to go to heaven?"

Jones—"No, it will be just my luck to have to live in one of the suburbs and commute."

Centre of Canada's Confederation Celebration

BY NELLIE L. McCLUNG

COPYRIGHT, CANADA, 1925

CHAPTER I

It all began with the rustle of silks.

When Helmi's Aunt Lili came back to Finland for a visit, after six years of the crowded ways of life in America, the older women folk of her family regarded her with mingled feelings of awe, envy and reproach. Her elder sister, Helmi's mother, said it was foolishness for a girl who had to earn her money hard, carrying trays, to put it all on her back and wear clothes that only queens should be wearing. At which Aunt Lili laughed, showing her gold teeth, and said it was a matter of principle with her to spend her money so fast that no one could steal it from her! Helmi was the one member of the family who gave the visitor full hearted and unreserved devotion. She loved the rich sound of her silken skirts. It was so luxurious, so blent, it seemed to raise the whole family to a higher social level, and she marvelled how anyone, even her mother, would dare to find fault with this wonderful person who wore silk stockings, had fur on the inside of her coat, and pink ribbons in garments that did not show at all!

Aunt Lili had not spent all her money on her own clothes. To Helmi's mother she had brought a purse which closed with a crack. It had a head on one side, and two claws which could be flapped on the other side; gold satin lining; mysterious chambers inside; and better than all was the delicate inference it conveyed regarding women and money. To Helmi's father she brought a silk handkerchief with wetted roses on both sides, a sort of magic handkerchief, for no matter how hard it was squeezed, in one's hand it would spring out again without even a wrinkle. To Anna, Helmi's big sister, who had her hair in bangs, she brought a square bottle of powder the color of skin, and a round downy thing to put it on with. Aunt Lili used a black sock herself for this purpose, but she said powder-puffs were certainly style in America now.

Aunt Lili made many contrasts between America and Finland. "You work too hard here," she said, "and you never play. We work in America, but we have good times, too. This country is all right for men, but what is there for women but raising children and work? When a woman here is married ten years she is old, and her life is over. It is all just giving in, and giving up for women, until at last they give out. I wouldn't live here if you gave me the whole country, I couldn't stand it now after

**TO WOMEN
OF MIDDLE AGE**

**Mrs. Wilson's Experience a
Guide to Women Passing
through the Change of Life**

Hamilton, Ontario.—"I have taken several bottles of Lydia E. Pinkham's Vegetable Compound and I cannot speak too highly of it as I was the Change of Life and was all run-down and had no appetite. I was very weak and sick, and the pains in my back were so bad I could hardly move. I got very sad at times and thought I had not a friend on earth. I did not care if I lived or died. I was very nervous, too, and did not go out very much. A friend advised me to try a bottle of Lydia E. Pinkham's Vegetable Compound, so I did. I am a farmer's wife, and always worked hard until lately, and was in bed for two months. I began to feel like a new woman after the first bottle and I recommend it with great success, also Lydia E. Pinkham's Liver Pills. I am willing to answer letters from women asking about your medicines, as I cannot speak too highly of them."—Mrs. EMMA WILSON, 471 Wilson Street, Hamilton, Ontario.

Sold by druggists everywhere. ©

W. N. C. 1924

Helmi with her golden hair, and eyes the color of the green brown moss in the bottom of the running pure at home. "Oh, just enough time to see Helmi and tell her things please please—God!"

And so the frightened Helmi, who had expected to be met by the Great Person who had brightened her childhood, came into the dark and dreary room, whose only vivid spot was the white face on the soiled pillow with its two burning eyes.

"Don't kiss me, Helmi. Ah! it's awful! It is a bad disease I have which goes from me, I thought it was just a cold like I often have, but it's worse than that. Anyway, I only wanted to see you and tell you. Don't stay with Mike, he says he will keep you. You do not owe him the money—it was mine. He wants you because you are young and pretty. The girls tell me he's acting bad already, and me not dead so soon. I have money enough to send you back, Helmi, that will be best. You know what is ahead of you at home. It might be worse. You will go back, won't you, Helmi?" Helmi fell on her knees beside the bed.

"But isn't it a good country, Aunt Lili, like you said? Can't I go along like you did?" she sobbed. "I can work, Aunt Lili, like you did."

"It's a good country, Helmi," said Aunt Lili when she could speak, "just like I said, only men are so bad, and it's hard for a young girl alone, and I am so afraid for you. Men just want their own pleasure. Mike was good to me while I could sport around and dance, and while I did not say a cross word to him for what he did to men when they got drunk. He takes their money, Helmi! I can't stand that. I threatened him I'd go and tell, and then he struck me with a chair. He never comes to see me now, Helmi, and he made me take this room above the bar because when people pay for rooms they want to sleep. He says, 'You're awake, anyway, with your cough, so what's the odds?' Helmi, men are queer and all for self. The trouble started when my little Helmi was on the way. I had her named for you. Men do not like kids, they're too much trouble. He was mad and cross at me because I was not smart and was sometimes sick, and when little Helmi came she only lived a day, and he was glad. Then I hated him, Helmi—I hate him now, and an dwas sometimes sick, and when one is going to die, but I cannot help it, Helmi, I wanted to warn you not to get mixed up with men they break your heart."

(To Be Continued.)

Seek Sunken Treasure

**Divers to Plumb Depths of Dangerous
Reefs off the Coast of France**

Sunken treasure, reputedly a huge fortune, is the goal of divers who plan to explore the dangerous reefs of the Isle de Oleron, off the west coast of France. The treasure consists of many boxes of diamonds, gold and other precious metals sunk in the wreck of the three-masted schooner "Jeune Henri" December 9, 1826.

The fortune was the result of the thirty year residence in the United States of the Comte de St. Paul, lord of the Vendee, who fled to the United States during the French revolution. For years he submitted to the usual tribulations of the pioneer, but finally lucky investments brought him an immense sum of money. Then he decided to return to his native country.

The count and his family escaped when the "Jeune Henri" was driven on the reefs of Oleron, but the gold was lost and the wealthy emigre died a short time later in poverty. Now an enterprising company of divers is seeking to locate the treasure.

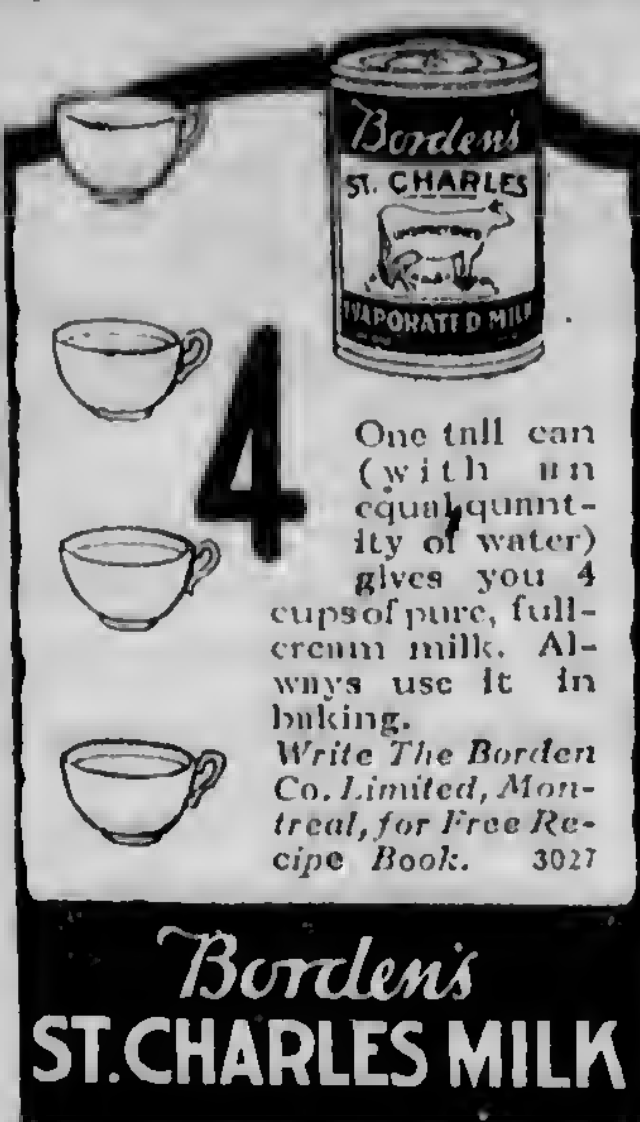

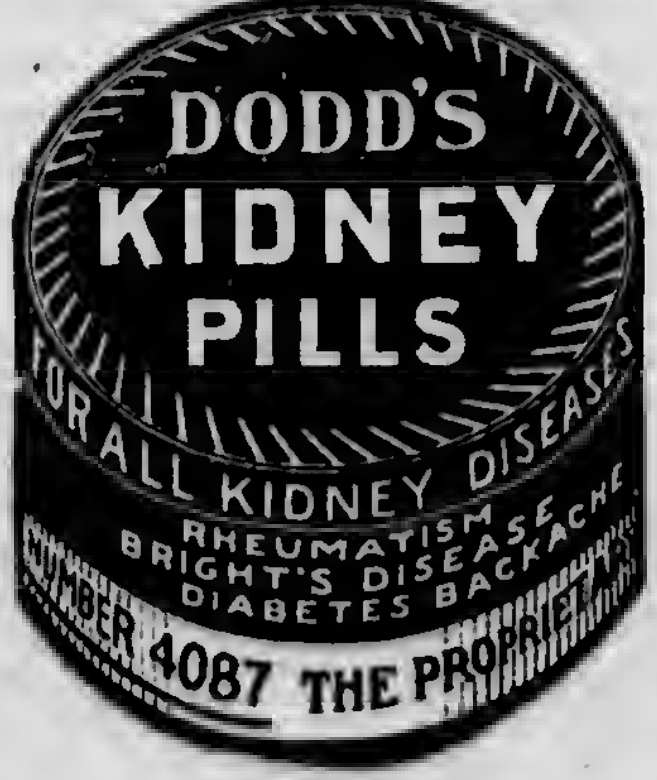

Had All of Them

A man wearing a worried look went into a shop which advertised a patent exterminator, and asked for a hundredweight.

"Certainly, sir," said the amazed assistant, "but that quantity would be sufficient to destroy all the slugs in the Queen's County."

"I know that," was the reply. "They are all in my garden."

Sea water looks blue on a clear day because it reflects the color of the sky.

**Moderation in Exercise**

**If Carried to Excess it May Become
Dangerous**

Do not envy Samson or Hercules. The strong man, says an expert adviser, is often the one who weakens first in the struggle for life. The man with moderate physical strength is the one who is likely to retain his health the longer and to get more enjoyment out of life.

A man who devotes much of his time in training his muscles to an exaggerated development, expecting at the same time to acquire a robust constitution, is making a double mistake. In the first place, he injures his health through over-exercising, and then his muscles assume a grotesque appearance which shocks the artistic eye.

If one observes the statues of ancient Greece, he will notice at first sight that there is no exaggeration in the size of the muscles. Perfection and beauty demand moderation.

Athletes practised in moderation produce beneficial results, while if it is carried to excess it becomes disastrous. The man who is gone to waste through overtraining will, sooner than he thinks, have to pay the penalty of his greatness.

Boys and young men seem to have a natural admiration for athletes. Nothing is more difficult than to discourage a boy who has made up his mind to become an athlete. For this, parents are largely to blame, as they often cite an athlete to their sons, as an ideal of manhood. It is rather remarkable that very often an athlete is a man of mediocre intellectual development.

If the following question is asked: What are the physical exercises recommended as likely to develop at the same time the body and the mind—"mens sana in corpore sano"—the bureau of statistics of any life insurance company will give the following answer: "For grown up boys and young men, exercise in the open air in the form of games and plays, will contribute more than anything else towards obtaining a sound and healthy body, capable of prolonged endurance. For men of a more advanced age, especially those of sedentary habits, light gymnastics, if possible in the open air, every morning, will suit the purpose."

When Holloway's Corn Remover is applied to a corn it kills the roots and the callus comes out without injury to the flesh.

Soviet Propaganda

**Decision Is Reached to Give Further
Support to Chinese Revolution**

Decision to make a more intensive campaign in support of the Chinese revolution, and to appeal to the workers of the world to assist Soviet Russia to sabotage other nations in the coming "inevitable" war, was reached at Moscow by the executive committee of the Third Internationale.

The committee declared that its sections have shown far insufficient support of the Chinese revolution, and therefore, proposes that the latter take resolute measures increasing propaganda in the press; active work among the trade union organizations; propaganda in colonial countries, and propaganda among soldiers en route to China.

National Dairy Show at Memphis, Memphis, Tennessee, will be the site of the 1927 National Dairy Show in the United States, the date being October 15th to 22nd. It will be a long distance for Canadian exhibitors to travel if dairy breeders here decide to maintain their previous honors at this show. In 1928 the show will be held at St. Louis, Missouri, where Canadian breeders were particularly successful in 1904.

Mrs. Pacque—"You—you—you peanut!"

Poeque—"Quite right, my dear. You're always making me shell out."

Campers—Take Minard's with you.

Would Girdle the Globe

**Colossal Number of Papers Printed
Every Week on Boulevard Street,
London**

For many years the "News of the World" has been produced in Boulevard street—a comparatively short thoroughfare leading southwards from Fleet street to the Thames embankment.

Despite its size, Boulevard street produces more newspapers than any other street in the world. If the pages of the papers sent out of this small thoroughfare in a week were placed end to end they would girdle the globe.

The vast weekly issue of the "News of the World" would provide a quarter of this belt, for, if the pages were placed end to end, they would make a pathway from London, across the Atlantic, across the United States, and a few hundred miles out into the Pacific Ocean on the way to Japan.

About 25,000,000 newspapers are published in Boulevard street each week, making a breath-taking total of 1,300,000,000 copies per annum.

To get the 4,000,000 copies off the machines in time to distribute them over the length and breadth of the British Isles on Sunday morning and over the rest of the world as fast as great liners can carry them, the huge battery of printing presses must produce copies of the "News of the World" at the rate of 7,000 per minute, or 420,000 per hour.

Each issue requires 500 tons of white paper, 16,000 lbs. of black ink, and to tie up the parcels, 70 miles of string.

A new building in course of completion will be the most modern in existence.

**NO MEDICINE LIKE
BABY'S OWN TABLETS**

**For Either the Newborn Babe or
the Growing Child**

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Atwood, R. R. 1, South Monaghan, Ont., says: "We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make feeding easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Will Grow Tobacco at Coast

**Possibilities of Growing Leaf in B.C.
to Be Tested**

Possibilities of the British Columbia coast as the centre of a large tobacco growing industry will be tested out this year as a result of experiments sponsored by T. E. Coventry, member of the Provincial Legislature. Seed has been imported and is being grown on two half-acre experimental plots at Saanich. One will be irrigated and the other worked without irrigation to test out the best method of production.

Wise mothers who know the virtues of Mother Traves' Worm Exterminator always have it at hand, because it proves its value.

Nova Scotia, in its Cape Breton part, is the most Scottish country in the world outside of Scotland.

Killing time may mean the suicide of success.

Little Helps For This Week

I will not leave you comfortless. I will come to you. John XIV. 18.

But He whose human feet have trod All paths of trial, He who knew No sympathy but that of God.

Though linked with flesh that craved it too, Years with us in our needs, our dreams;

And mindful of our feeble frame, Holds to His heart our throbbing heads, With love that hath no mortal name.

—Margaret J. Preston.

We can never know a sorrow into which the Son of man cannot enter; and we can never understand the depth and preciousness of His sympathy till we come to need it. I have had a very deep wound, the trial has been very severe; but how should I have known Christ as a brother without it?

—Lady Powerscourt; Letters

Spare the children from suffering from worms by using Miller's Worm Powders, a most effective vermifuge with which to combat these insidious foes of the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and so thoroughly that nothing more is desired.

Alfalfa can be grown over the widest range of climatic conditions of any legume yet grown in Canada. It is now being produced in every province from the Atlantic to the Pacific.

Ease sunburn with Minard's Liniment.

Samuel L. Clemens, better known as Mark Twain and much beloved, made a real contribution to the youth problem of our day, when he said, "If you would train up a child in the way her should go, you have got to go that way yourself."

**Three Nights Entertain-
ment Coming
to Raymond**

L. D. King, manager of the
Opera House, has made arrange-
ments for the appearance in the
Raymond Opera House for the
nights Monday, Tuesday and
Wednesday, June 20, 21 and 22, of
Bert Johnston's Big Magic and
Fun Show. The company comes
highly recommended, having
played in Cardston and Leth-
bridge last fall, and making re-
turn engagements.

The company is under the man-
agement of Joe Marks, one of the
famous Marks Bros., who are well
known throughout Canada and the
United States. The Bert John-
ston company, have just completed
a tour from the Atlantic to the
Pacific, and are now returning
east having spent five months in
B. C. playing all important cities
and towns there.

Mr. Johnston spent three years
at the front during the World
War, and was the only man on
the western front who was issued
a pass by the French government
to travel on their railroads. In
order to carry on his line of enter-
tainment he has travelled all over
the English speaking countries of
the British Empire and India.

While in India he made an ex-
tensive study of the Hindus, their
psychic of magic and Black Art.
He has mastered many of their
greatest illusions which have help-
ed to make his entertainment
stand out far superior to anything
attempted on the vaudeville stage.
Mr. Johnston is acknowledged as
one of the cleverest men in his
profession today. Together with
Salvail, the converted gambler,
and Muriel, who is acknowledged
as the world's greatest mentalist,
and the only woman in America
who accepted and successfully
passed the acid test given by the
Show World at offices in Chicago
on December 21, 1910, and the
only woman in the world who
predicted the correct day and date
of the signing of the Armistice and
the ending of the World War.

You can ask her any question;
she will answer free to all from
the stage. A special matinee will
be given Wednesday after school.
Prices within reach of all. Nights,
25c and 60c. Matinee 15c and 35c
tax included. Complete change of
program each night.

"SIGN FOR SAFETY"

The Second Series of Wheat Pool Contracts

SAFETY because it is a farmer-owned and controlled co-operative association
which markets over fifty per cent of Canada's wheat crop.

SAFETY because it guarantees to the farmers every cent paid by the con-
sumer minus only the minimum costs of marketing.

SAFETY because it increased the farmer's income and independence by giv-
ing him a voice in the selling of his crop.

SAFETY because it insures the farmer against the losses and uncertainties
caused by fluctuating speculative markets.

SAFETY because of low handling costs. The total annual expenses of oper-
ating the Alberta Wheat Pool in 1923, 1924 and 1925 was less than
one-half a cent per bushel. The total expense of the Central Selling
Agency in 1925-26 was one-fifth of a cent per bushel.

SAFETY because the Pool employs experts to handle and sell its grain.

SAFETY because Pool elevators guarantee fair weights, grades and dockage
and good service.

SAFETY because the Pool merchandises wheat as the demand arises and
and thus avoids depressing values by offering more than the consumer
will take at fair prices.

SAFETY because the sole aim of Pool salesmen is to get the true value of
wheat for its members.

News Notes

W. D. Walton, of Diamond City,
was a visitor here last Monday and
Tuesday. He likes the Lethbridge
Northern first rate, and has his 80
acres all seeded.

The marriage of Miss Leona
McLean to Wm. C. Lamar was
solemnized last Tuesday evening
at the Cardston Temple. Their
many Raymond friends wish them
every happiness.

Grade 11 and 12 started their
final exams yesterday morning.
Other grades start Monday morn-
ing.

The Alberta wheat Pool will
build a terminal elevator at Van-
conver this summer with a capacity
of 2,400,000 bushels. This will be
the largest terminal on the coast.
The cost will be \$2,000,000.

W. T. Barratt, Frank Shaw,
Geo. Ralph, Wm. Wiggill, T. R.
Roberts, Jack Mehew and Ernie
Organ were among those who saw
the Scottish football team play at
Lethbridge last Monday.

Alvin O. Rich of Magrath was a
business visitor here last Monday.

FOR SALE—No. 12 DeLaval
cream separator, good as new,
bedstead and springs, double spring
couch and heating stove. Apply
to Mrs. George Selman, Raymond.

Ray Knight intends roping a
calf from a car driven by himself
at the Calgary Stampede, July 11
to 16. Calf roping from a fast
travelling car has always been
considered a two-man job. But
Ray is going "one better", as
usual.

News Notes

Lee Selman, Jim McLean, A.
B. Stevenson, Chick McLean, Bull
Gillette, Jack Jones, Chas. Titts-
worth and Buttons Jones, who
have been shearing sheep in four
of the states to the south, left last
Sunday by auto for Brooks where
they will clip 18,000 head of sheep
for the Knight Sugar company.
Each man will average 125 head
per day and will receive 15 cents
per sheep. Figure it out yourself.
Jim McLean carries his fiddle and
steel guitar and gives the boys an
evening concert after their hard
day's work.

The drive for the sign-up of the
Second Series of Wheat Pool con-
tracts is under way and meeting
with splendid response. A Wheat
Pool Rally was held in Calgary
previous to the commencement of
the campaign. The Pool delegates
members of parliament, representa-
tives of urban centres, and others
attended this gathering.

Furnished Bed Rooms for rent,
by week or month. Location one
block east of Town hall. Apply
to Mrs. Elsie M. Stevenson, Ray-
mond.

For Sale—Young pigs, purebred,
at \$1.50 each. Apply to C. W.
Stone, Raymond.

For Sale—Violin, cost \$20, shap-
ed leather case, cost \$7.50, bow,
cost \$5. Entire outfit to go at
\$20. Apply Kenneth Stone Ray-
mond.

Dr. H. N. Heal, Magrath, will
be in charge of the dental office
here during the absence of his
brother, Dr. H. H. Heal, who is
spending two weeks at Vancouver.

News Notes

S. A. Smith and family, and
Mr. Carlson and family left yester-
day for Utah by auto.

Next Sunday at 11 a. m. the
new Catholic church will be dedi-
cated by Bishop Kidd of Calgary,
assisted by Fathers Murphy, Green
and Fabre. The Lethbridge Cath-
olic choir will be in attendance.
The new church at Hardieville
will be dedicated earlier in the
morning.
